

MLA4105 Shielded Biopotential Electrodes (Ag-AgCl, 4mm, 5 pk)

Spare Parts

The MLA4105 Shielded Biopotential Electrodes (Ag-AgCl, 4mm, 5 pk) are designed to record biopotentials such as EMG, EEG via the MLA2540 5 Lead Shielded Bio Amp Cable (purchased separately). The 4 mm sensor is made from a fine grain, homogeneous mixture of Ag-AgCl compressed and sintered for strength and stability. The electrode is 1 mm thick and encapsulated in durable housings. It is supplied with PVC insulated lead wires.

Caution

Read “Statement of Intended Use” on our website before use. Leads are not supplied sterile. Appropriate Infection Control Procedures should be followed between subsequent subject connections.
