LTS2010 Biopotential Sensor
Lt Sensors Series

Description
The Lt Sensors Biopotential Sensor is a galvanically-isolated, high performance differential amplifier optimized for the measurement of a wide variety of biopotential signals, including ECG, EEG, EMG and EOG. It is supplied with MLA2505 Shielded Lead Wires (5 pk) and MLA1010 Disposable ECG Electrodes (100 pk).

Operation
The Biopotential Sensor is connected to the MLA2505 Shielded Lead Wires (5 pk), then attached to the skin surface using MLA1010 Disposable ECG Electrodes (100 pk).

To use the Biopotential Sensor, plug the sensor into the USB port of a laptop or desktop computer, with a Windows operating system. Alternatively, plug the sensor into a USB hub connected to that computer. A green LED on the connector housing indicates the transducer is receiving power and is ready for use.

Application
The Lt Sensors Biopotential Sensor is used to measure a wide variety of biopotential signals, including ECG, EEG, EMG and EOG.

Typical Data

ECG and finger pulse data
**Caution**
Read “Statement of Intended Use” on our website.

**Specifications**

Operating frequency:
- ECG, EMG: 0.5 Hz to 200 Hz
- EEG: 0.5 Hz to 50 Hz
- EOG: DC to 500 Hz

Input Range:
- ECG: 200 mV
- EMG: 200 mV
- EEG: 200 mV
- EOG: 200 mV

Noise:
- 1 Hz to 500 Hz: <5 μVrms (12 μVp-p max.)

Gain Accuracy: ±1.0 %
Isolation: 5200VDC for 1 minute
Operating Temperature: 15 °C to 40 °C
Cable length: 2m (6.5’)
Connector: USB

All specifications were tested at the time of printing and are subject to change.

**Ordering Information**

LTS2010 Biopotential Sensor

For use with:
- Laptop or desktop computer with Windows operating system

**ADINSTRUMENTS.com**

ISO 9001:2015 Certified Quality Management System

WARRANTY: 1 year as per ADInstruments warranty terms for Lt Sensors.
